EDUCATION

Mangalore Institute of Technology and Engineering

B.E. Computer Science and Engineering (CGPA: 9.37)

Sep 2023 – Jun 2027

Karnataka, India

TECHNICAL SKILLS

Languages: Java, SQL, Python, C

Backend Technologies: Spring Boot, Spring Data JPA, Spring Security, EF Core, REST APIs, FastAPI

Databases: PostgreSQL, MySQL, Redis, MongoDB

Tools & DevOps: Git, Docker, Linux, GitHub Actions

AI-Assisted Development: AntiGravity, Cursor, ClaudeCode, Iterative prompt-driven full-stack workflows

Core Concepts: OOP, API Design, Authentication & Authorization, Transaction Management, Debugging

INTERNSHIP

Backend Engineering Intern

June 2026 – Present

LazyStudents.in

Remote

- Primary backend engineer building a plagiarism detection and reduction service from scratch – owning the text-comparison pipeline, backend API, and suggestion engine end-to-end.
- Lead a cross-functional interns team – data analyst, frontend and backend engineers, and a Figma designer – coordinating scope and delivery directly with technical and managerial co-founders in Agile sprints.
- Own end-to-end quality across 40+ platform tools, writing structured test plans and filing reproducible bug reports that feed directly into sprint prioritization.

AI/ML Intern

Sep 2025 – Nov 2025

Infosys Springboard

Virtual

- Built Flask REST APIs coordinating 3 ML inference models (MusicGen, fine-tuned GPT, YAMNet) for an AI music generation platform; implemented model preloading that cut initialization latency 45% (2.2s → 1.2s).
- Designed graceful fallback routing and error-handling middleware ensuring inference continuity under model failures; persisted metadata and classification results in MongoDB.

Flutter Developer Intern

Jul 2025 – Sep 2025

ClubChat – Startup

Remote

- Shipped event-feed and real-time chat features to a production mobile app with 8,000+ users; resolved 18 stability issues across two releases.

PROJECTS

Arachnode: Automated Job Discovery & Outreach Platform | *Python, FastAPI, Redis Streams, PostgreSQL, Docker*

- Architected a self-hosted, event-driven platform automating job discovery, recruiter contact enrichment, and AI-assisted outreach across six independent microservices communicating through Redis Streams.
- Built OSINT-based recruiter enrichment and AI-drafted cold outreach automated end-to-end via a scheduler, cutting manual job-search effort by **80%+**.
- Open-sourced with **26 GitHub stars and 47 forks**; serve as Project Admin reviewing 25+ PRs and mentoring GSSoC/ELUSOC contributors.

Appraisal Management System | *Java, Spring Boot, PostgreSQL, Hibernate*

- Engineered a workflow-automation platform digitizing faculty appraisals, replacing a paper process with a state-driven approval flow (Draft → Reviewed → Finalized → Locked).
- Implemented JWT authentication, role-based access control across 4 roles, and server-side validated scoring rules.
- Built transactional APIs with a full audit trail on every state transition for traceable appraisal history.

Offline AI Assistant Shell | *C, Linux Syscalls, Seccomp*

- Built a sandboxed C shell integrating an offline LLM (llama.cpp + TinyLlama-1.1B) for fully air-gapped, AI-assisted command guidance.
- Four-layer security model – Seccomp syscall whitelisting, namespace isolation, capability dropping, rlimit caps; validated with MD5 model-integrity checks and strace-based syscall auditing.

LEADERSHIP & COMMUNITY

Project Admin, Arachnode & President, Coders Club

Oct 2025 – Present

GSSoC / ELUSOC / Aperture – MITE Campus

- Serve as Project Admin for **Arachnode**, reviewing PRs, enforcing API contract standards, and mentoring GSSoC/ELUSOC contributors; merged 2 PRs into GitCanvas under Aperture 3.0.
- President, Coders Club – organized **Hack n' Seek** (700+ online, 180+ on-site participants) and mentored students in Git, DSA, and backend development.
